

Name 1: _____

Name 2: _____

Worksheet - Lab2

1. How do you make a function in Snap?
2. Explain how you made the **Draw Polygon** block using generalization.
3. Why should we make our own blocks?
4. Name 3 different ways you can make a block repeat.
5. Explain how the for loop works.

6. Describe how composition helped you to make the `Draw Flower` block.

7. What are some things to consider when making custom blocks, specifically those that might be used by other blocks.

8. What does the pick random block do? Give a scenario where this functionality could be useful.
