## Worksheet - HW Lab2

When you are done working through the online lab:

- Export and upload your `Draw Field of Flowers` and `Bug Dance` scripts to the dropbox.
- Either print/scan this worksheet or type up the answers to the questions below in a MS Word TXT or RTF document. (Any other document format submitted may receive no credit if I cannot read it.)

1. Describe how composition helped you to make the `Draw Flower` and the `Draw Field of Flowers` blocks.

2. Explain how the pick random block works. Give one example of how you used it in your HW scripts.

3. What are some things to consider when making custom blocks, specifically those that might be used by other blocks.
